

INSTALLATION & MAINTENANCE INSTRUCTIONS

FOR THE ASHWORTH

Wall Mounted Luminaire

Echelon COLLECTION TIRON SERIES

76016

Figure 1

NOTE: THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODE BY A PERSON FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED.

INSTALLATION

- 1] The Ashworth Series is designed to be mounted directly to a surface using 4 anchors.
- 2] The knockouts for mounting correspond to the holes in the white mount pan. Mount the housing and pan firmly to the surface. Pull the supply leads into the housing.
- 3] **NOTE: TURN OFF CIRCUIT THAT FIXTURE IS BEING WIRED TO AT CIRCUIT BREAKER PRIOR TO CONNECTING FIXTURE LEADS.**
- 4] Connect the fixture leads to the supply leads. TLI stipulates the Black as Line; White as Common; Green/Bare as Ground. Connections should be made in the compartment opposite the ballast compartment. Make sure no wires rest against the reflector.
- 5] Check the re-lamp label to ensure that the lamp is the specified wattage. HID lamps should be hand-tight. For best operation, screw in the HID lamp, remove, and re-tighten. Fluorescent lamps will not snap into incorrect lampholders.
- 6] Outdoor wall fixtures must be caulked with a suitable waterproof sealant across the top, and at least halfway down each side of the fixture to properly seal it to the mounting surface. A small space should be open at the bottom for excess moisture runoff.

MAINTENANCE

The lens should be cleaned once every 6 months. Repeat the above procedures in reverse to remove the lens. It must be washed in a mild soap solution. **DO NOT** use cleaners containing bleach. Re-assemble the fixture.

The metal portion of the fixture can be wiped clean as needed using a mild soap solution.

ATTENTION: Avoid moving any exposed wires. If any wires are accidentally disconnected, call a professional to repair.

These instructions are general to the fixture noted. Due to the numerous options, all variations may not be covered.

Installation of an electrical luminaire must be performed by a qualified professional. The fixture must be wired in accordance to all local & national electrical codes.
